

Michael J. McHugh

Vice President, Engineering, BEA Systems, Inc.

Michael McHugh is Vice President, Engineering, BEA Systems, responsible for driving the engineering direction of the award-winning BEA WebLogic Server.

Mr. McHugh has been involved with WebLogic Server from its beginnings as an innovative application of Java for server-side programming. He was instrumental in developing the strategy that drove WebLogic Server to become a flagship BEA product and the leading implementation of what is now known as J2EE.

Prior to joining WebLogic, Mr. McHugh held several senior positions in the database industry at Sybase, Unify Corp., and smaller startups, beginning his career in the world of mainframe transaction processing.

Mr. McHugh holds a Bachelor of Science degree from the Illinois Institute of Technology.
