

## Product Demos

### **Attachmate Smart Connector**

Attachmate Corporation unlocks legacy assets from IBM, Unisys, UNIX, and Open systems to capture legacy data and transactions as callable services for use in new application development on any J2EE(tm)-compliant Application Server. Attachmate will demo the Smart Connector for 3270 & 5250 and capture a legacy transaction as a J2EE Connector Architecture Resource Adapter for use in a Java(tm) System Application Server Platform Edition 8.

### **About Attachmate Corporation**

Attachmate Corporation, one of the world's largest privately held software companies, is the only all-mainframe-connectivity expert in the industry. For over twenty years, the company's productivity-focused innovation approach to the market and product development has enabled Fortune 1000 and Global 2000 enterprises full access to - and leveraging of - all mainframe resident business logic and data, via any and all types of connections. Attachmate is a Microsoft Gold Certified Partner, BEA Premier Partner, Unisys® Partner, and Sun® iForce Partner. For information, visit <http://www.attachmate.com/SmartConnectors> or call 425.644.4010.

### **iWay Software Universal Adapter Framework**

iWay Software will demonstrate the power and simplicity of its Universal Adapter Framework. The Universal Adapter Framework enables rapid, cost-effective creation and maintenance of interfaces to complex enterprise information systems – translating into a true Enterprise Service Oriented Architecture. Specifically, at this event, iWay Software demonstrated the Universal Adapter Framework, deployed into the Java(tm) Enterprise System, using the adapters for SAP, Siebel and PeopleSoft to generate SOAP-based Web Services.

### **About iWay Software**

iWay Software is the world's leading provider of adapter technologies, empowering organizations to integrate more data sources on more platforms and across more network protocols than any other vendor. Our Universal Adapter Framework is a robust integration architecture that enables you to meet broad connectivity needs and reach virtually any information asset with just a single required skill set. More than 250 codeless, plug-and-play adapters make up the foundation of the Universal Adapter Framework, providing access to virtually any enterprise system. These easy-to-use adapters offer similar functionality and capabilities and are designed to work seamlessly within any computing platform and information system, which lets you implement high-impact integration initiatives while preserving your current technology investments. And, because it eliminates the need for heavy individual adapters, it dramatically reduces the time, cost, and complexity of enterprise integration. The Universal Adapter Framework also offers a high degree of reusability and can be leveraged across various IT initiatives such as enterprise application integration, data warehousing, business intelligence, mobile computing, and more. ## **Librados Enterprise Application Adapter**

Librados will be demonstrating its enterprise application adapters that incorporate the new features defined in version 1.5 of the J2EE(tm) Connector Architecture Specification. Librados will also demonstrate additional functionality that leverages target enterprise application metadata, so that hand-mapping of request and response formats in and out of enterprise systems such as SAP R/3, Siebel, PeopleSoft, Oracle and others, is completely eliminated. These products will be running on Sun's J2EE 1.4 compliant Java(tm) System Application Server Platform Edition 8.

### **About Librados, Inc.**

Librados offers more than 50 pure Java, J2EE standards-based application adapters that expose back-end enterprise application functionality from systems such as SAP R/3, Siebel, PeopleSoft, Oracle and others in a wide variety of formats, including XML and Web services.

Librados is changing the economics of the enterprise application adapter marketplace with its unique royalty-free source code license model that offers ISVs unlimited distribution rights, without any OEM pass through payments. Low cost server license options are also available for end-customers. Major end-customers and ISV's such as British American Tobacco, Neopost, Novartis Pharmaceuticals, Lawrence Livermore National Laboratories, and Embarcadero Technologies rely on Librados for the critical last mile of application integration. ## **Seagull Software LegaSuite**

LegaSuite's host integration module is a fully compliant J2EE(tm) Connector Architecture Resource Adapter to connect new J2EE technology with enterprise legacy systems, providing a fast path for robust integration of legacy functionality with open architectures. As a J2EE Connector Architecture Resource Adapter, LegaSuite simplifies and accelerates host integration, exposing legacy business functions as a common API and set of services within a J2EE environment. Industry-standard LegaSuite interfaces are called from within the Sun Java(tm) System Application Server 8.0, making heterogeneous business functions available to Java developers as a familiar J2EE component with complete transparency to the legacy systems. LegaSuite transforms host systems into callable business services with interfaces that J2EE developers readily understand.

### **About Seagull Software**

Seagull Software specializes in tools for legacy-aware application development, helping organizations to deliver exponentially faster IT support for business change. The company's flagship product line is LegaSuite®, an integrated platform of modular software tools for transforming legacy systems from roadblocks into building blocks. With LegaSuite, organizations connect mainframe, iSeries and VT applications to the Web and to other, newer generations of applications and architectures including XML, J2EE, .NET, (X)HTML and Web Services. Customers use LegaSuite to facilitate end-user transparent migration from older system to newer systems over time, yielding the optimum in strategic flexibility and ROI from existing assets. Committed to providing the best customer experience in the industry, Seagull Software's technology is licensed to more than 8,000 Global 2,000, mid-market and public sector organizations worldwide.
