

OPENSOLARIS INDEX

OpenSolaris celebrated it's first anniversary on June 14, 2006!!

40+ Communities in play--highlights include:

- Solaris to PowerPC (community named Polaris)-SunLabs pushing new code any day!
- Laptop usability and Wireless drivers for Solaris 10 (most cards now supported!)
- 5 distributions of OpenSolaris code now available:
 - Solaris 10
 - SchilliX
 - BeleniX
 - NexentaOS
 - MarTux
- BrandZ community (formerly Janus project technology) supporting Linux applications so they run native on OpenSolaris/Solaris 10
- Storage community--and they've already released NWS drivers, libraries and utilities
- Drivers community
- Documentation community
- Internationalization
- Usability and ease of use projects
- 30 Registered OpenSolaris User Groups world wide--highlights include:
 - Representation on every continent except Antarctica
 - Average number of attendees at meetings: 30
 - Highest attendance averages: Beijing: 75 Silicon Valley: 75

Open sourced technologies on OpenSolaris:

- OpenGROK Source Browser (open sourced 11/05)--Java-based--averages less than 2 milliseconds for obscure text searches!
- Solaris ZFS (open sourced 11/05 and added to Solaris Express Community Edition code base in Build 28)
- XEN project participation (mgmt of Solaris OS to virtualized server environment) (demonstrated 11/05)
- Solaris Containers for Red Hat Linux Binary Apps (to be integrated by end of year)
- ON portions of OpenSolaris (Networking, Commands, Libraries--10M lines of code) (6/14)

- DTrace (open sourced 1/05 during opensolaris.org pilot phase)

New code—updates:

- Build 41 of the OpenSolaris source code (nevada project) now available for download (6/11/06)
 - Updated SNMP packages available from build 32 or higher.
 - Network Storage (NWS) consolidation code included with OpenSolaris (drivers, libraries, utilities)

CUMULATIVE TOTALS FOR OPENSOLARIS PROJECT from 6/14/05 to 5/08/06

14,000 Registered community members (11,200+ non-Sun, 1,300+ are Sun employees)
39,300 Postings to OpenSolaris discussion groups
33,000 Recorded downloads of OpenSolaris source code (actual is probably higher) [1]
30 Registered OpenSolaris user groups
440 Bugs reported by the community
147 Fixed / closed / in progress bugs reported by the community
170 Community code contributions offered to OpenSolaris
100 Community code contributions integrated into OpenSolaris (Putbacks)
