

EXCITING WEB LEARNING

Web-enabled multimedia courses can now be produced quickly and economically, updated at any time to reflect changing instructional needs, and customized for each learner's optimum mode of learning.

eZioskills is a Learning Content Management System (LCMS) designed for the rapid development and effective delivery of all types of educational courses. eZioskills is quickly installed, fast and easy to use, and inexpensive to run and maintain. With eZioskills, you can effectively manage the production and delivery of your training programs. On-the-job real-time on-line problem solving is implemented via eZioskills unique interactive searching via your own web browser.

EZIOSKILLS FUNCTIONS

Easy course creation

Rapid development

eZioskills' advanced user interface reduces the time and cost of producing multimedia courseware. Existing documents, objects and multimedia files can be indexed into eZioskills to further speed up development.

Update without redesign

Updates can be made at any time by the course creator – without programming. This reduces course maintenance costs and enables organizations to react quickly to changing markets and training needs.

Effective learning environment

Self-managed learning

The rich navigation and learning features in eZioskills give stimulating and effective access to course materials. eZioskills' tests and assignments, with immediate feedback, enable

learners to track their progress and improve their retention.

Personalized environment

With eZioskills learners can annotate the material with their own notes and information. Personalized remedial feedback and statistics guide them as they progress through the course. Learners can choose their optimum learning modes.

Bridges the learning-productivity gap

Post learning refresher access

eZioskills enables learners to access material at any time for refresher sessions. Their personally annotated material is always available.

Real time problem solving

eZioskills bridges the gap between training and work situations. For increased productivity, the training material, with the learner's personal annotations, can be accessed on-the-job to quickly answer a question.

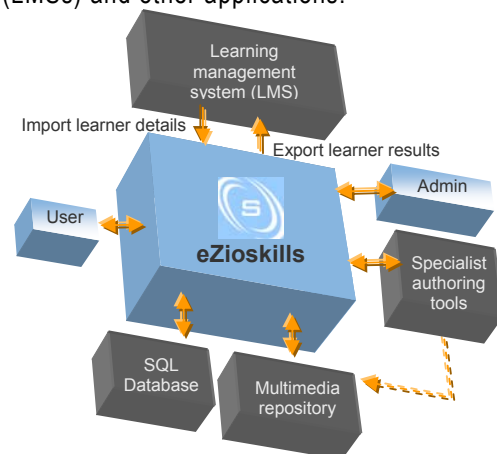

Integration into infrastructure

Interoperability

Interoperability with existing infrastructure enables organizations to maximize their return on resources.

Conforms to standards

eZioskills conforms to XML and emerging SCORM content standards. Organizations are not locked into a proprietary solution. Data can be shared with Learning Management Systems (LMSs) and other applications.

Scalability

eZioskills solutions can be scaled up to meet your organizations future needs.

Total cost of ownership (TCO)

eZioskills reduces TCO by minimizing the support needed from technical people and by interoperating with your existing IT systems.

Quick deployment

eZioskills can be deployed in a matter of hours or days to minimize disruption and maximize efficiency.

Option to upgrade

eZioskills is part of a customizable suite of related products. Please ask how to implement broader solutions in your organization.

Administration

- Import/export entire courses
- Import /export learner details & results
- Support any language: English, Japanese, Chinese, Spanish for instance.
- Create & maintain access rights

Development & delivery

- Web-enabled
- Import existing materials
- Add hyperlinks, pictures, videos or files
- Enable, disable, move or copy objects
- Configurable delivery style
- Favorites folder and annotations
- Preview created material
- Set learning modes
- Online help

Testing & assessment

- Automated test creation
- Pre-learning & practice tests
- Automatic feedback on test results
- Automatically graded exams
- Templates for marking assignments
- Generate reports on activities

Progress tracking

- Automated progress tracking
- Feedback and reporting to learners
- Reporting to supervisors
- Course statistics and learner information

Supported Environments

Browser

Netscape Navigator
Mozilla
Internet Explorer

Operating system

Sun Solaris 9
Sun Solaris 10

Databases

Oracle
PostgreSQL

Hardware Platforms

Sun UltraSPARC
x86
AMD Opteron

Learner access

- Personal folder
- Powerful navigation features
- Self managed or sequential learning
- Intelligent tutor allows Interactive question & answer
- Index and table of contents search
- Automatic feedback on tests
- Personal remedial guide, annotations, folder, statistics
- Multimedia format quizzes and results tracking
- Personalized learning modes for whole brain learning

Post training access

- Quick revision at any time
- On-the-job real time problem solving

Security

- Fine grain security model with PKI and Digital Signatures.
- Full usage control based on user groups and functions
- Protected access
- Audit trail

Standards & interoperability

- Conforms to XML standards and emerging SCORM specifications
- Shares data with LMS and other applications
- Based on Java J2EE and related technologies
