

ENCompass

FOR DIGITAL COLLECTIONS

Take control of your local digital assets

ENCompass for Digital Collections is a comprehensive system for local digital content creation, management and access. Libraries all over the world are using ENCompass to manage their collections of papers, audio, art images, and other important cultural heritage material. It's flexible enough to support many needs, but simple enough to get up and running quickly and efficiently.

SIMPLIFY DIGITAL ASSET MANAGEMENT

▶ Delivering access to all local digital content through one system, independent of format or location.

INCREASE EFFICIENCY FOR RESEARCHERS

▶ Unify access to your local collections and make them easier for researchers to use.

MANAGE COLLECTIONS FOR THE LONG TERM

▶ ENCompass for Digital Collections is a digital asset management system built to support your preservation initiatives and designed for future growth.

ENCompass

FOR JOURNALS ONSITE

Take control of your local e-journal content

ENCompass for Journals OnSite (EJOS) is a system that locally stores and provides access to electronic journal content from any publisher in one location. EJOS enables users to search and browse all licensed e-journal content in one interface, and staff can manage full text e-journal content in one location.

INCREASE RESEARCH EFFICIENCY & SECURITY

▶ Centralize all e-journal content into a single repository, searchable via one interface. Plus, the single repository provides a secure and confidential environment for researchers to view e-journal content.

EXTEND THE LIFE OF YOUR E-JOURNAL INVESTMENT

▶ Create a permanent local repository of all your licensed e-journal content. In addition, EJOS enables your institution to consolidate and reduce potential duplications of e-journal subscriptions.

EMPOWER RESEARCHERS

▶ EJOS provides researchers with tools to personalize their research experience and increase productivity.

ENCompass

FOR RESOURCE ACCESS

Take control of diverse information resources

ENCompass for Resource Access provides a framework for searching and managing a wide variety of online resources by providing access through one user-tested research portal. Delivering a sophisticated federated search system, it helps libraries connect researchers with the information they need while providing an infrastructure designed to support your library's growth.

MAKE RESEARCH FASTER AND EASIER

▶ Unify access to diverse information resources, local and external, in a “one-stop” research portal that provides researchers with the right information when they need it.

MAKE THE MOST OF YOUR RESOURCE INVESTMENT

▶ Simplify access and drive increased usage of the premium resources you license.

REDUCE USER TRAINING NEEDS

▶ Provide researchers one standard interface for searching the diverse databases you provide.

▶ Take control of all your library's assets with library management solutions from Endeavor

Since 1994, Endeavor Information Systems Inc. has pioneered the development of advanced library management software systems. Endeavor's full suite of products offer superior functionality coupled with intuitive interfaces that increase usability and efficiency. With a strong leadership heritage and extensive financial and technology partners, Endeavor provides the ideal, long-term end-to-end solution for librarians who manage increasingly diversified assets.

TOTAL ASSET MANAGEMENT:

- ▶ Endeavor software seamlessly integrates data management, digital media management and operations for a complete view of library resources. In addition, all Endeavor products have been designed and built to work together, providing solutions that scale to meet library needs today and well into the future. Even as library needs and collections grow in complexity, Endeavor enables you to build upon existing infrastructure.

EFFICIENT:

- ▶ Endeavor enables libraries to work smarter and increase efficiency by reducing overlapping costs as well as delivering enhanced reporting and simplified workflows. And because Endeavor is committed to continuous usability improvement, each product has an intuitive, user-focused interface that help both staff and patrons increase their efficiency.

PROVEN AND TRUSTED:

- ▶ Endeavor's proven library management system has provided years of system continuity and stability at research libraries around the world. Its heritage of technological innovation and service to libraries as well as its significant financial strength as a wholly owned subsidiary of Elsevier combine to make Endeavor an industry leader.
