

SITS:VISION

Strategic Information Technology Services Limited is a UK based company, founded in 1989. SITS has become the acknowledged leader in the provision of Student and Course Management software, consultancy and support services for academic administration for Higher Education Institutions in the UK, with over 60% of the market. Our market leading solution, SITS:VISION and our “self-service” web portal, e-VISION, all supported by “SITS:Consulting”, have put SITS Ltd firmly at the top of the class for UK Universities and Colleges’ Student and Course Management systems.

“SITS:Vision is used by over one a half of all UK HE Institutions”

SITS Ltd is privately owned with the shareholders being made up of the directors and employees. SITS has its headquarters in Hull, England and a further office in Stirling, Scotland. SITS presently employs 68 staff, many of whom have worked at a senior level in academic, administrative and MIS departments of UK universities, Colleges and national HE organisations. The company has enjoyed progressive growth year on year, whilst being consistently profitable. Such profits have been invested in both Company resources and continued development of the SITS:Vision product, for the future benefit of our Company, Staff and Customers. SITS now has a total of 113 Customers in its growing client base including, The London School of Economics, University of Bath, University of York, University of Reading and the London University Colleges.

Throughout the years, SITS has continued to enhance and re-engineer our innovative software to meet the changing needs of today’s institutions and our growing customer base. We focus on the application - which is the same no matter what the platform - and you the customer decide the environment. A key aim is to enable customers to take advantage of technology enhancements in a progressive way – **“managing revolutionary changes in an evolutionary framework”**.

The open systems philosophy extends also to a willingness to interface with and create effective partnerships with other suppliers and their products where they offer products and services that complement ours. Thus we interface and integrate with a variety of student accommodation, alumni, finance, personnel, library, timetabling, attendance recording, postcode systems and managed learning environments.
