

Visual Numerics, Inc. is pleased to offer the Knowledge in Motion™ education program for its JMSL™ Numerical Library for Java™ applications.

This program opens up a new learning environment for professors and students. It provides the ability to build powerful analytics in Java for collaboration and sharing across organizations. In addition, it allows for a deeper understanding of mathematical and statistical principles across disciplines on one of the most open and widely used platforms available. The JMSL Library charting functions are an excellent source to visually illustrate these principles as well.

Visit our Learning Center

www.vni.com/solutions/education/learning_center.html to discover how many professors are finding great success by using the JMSL Library as part of their course offerings.

Professors of accredited universities or colleges who plan to use the JMSL Library as part of a course offering are welcome to apply to become a member of the Knowledge in Motion Program. As a member, you will receive:

- FREE personal use license of JMSL for your course development
- FREE three volume set of the JMSL Library documentation
- FREE product support
- FREE registration for JMSL Library web seminars
- Discount on purchases of other Visual Numerics products for your personal use
- Dedicated point of contact for support of your account
- Special pricing for student licenses
