

Sun Academic Initiative

Turn It Up A Degree!

Give your students the skills they need

In today's world of higher education, students are looking for more than just a diploma. They're looking for an edge, and with Sun technology training, they can master the skills that will help propel them into fulfilling careers, right from the start. Those skills can be difficult to teach, especially with the resource constraints that most departments in post-secondary institutions face. By offering those skills, you can feel confident that enrollment in your program will benefit. To help you bridge that gap and deliver on the promise of anyone, anytime learning and computing, Sun is providing the Sun Academic Initiative.

Highlights

- Leverage Sun's expertise as an industry leader in technology and learning
- FREE unlimited access to Web-based courses on Java™ technology, Solaris™ OS system administration, Java Enterprise System infrastructure products, and the complete StarOffice™ productivity suite
- Industry-recognized credentials through our professional certification programs
- Easy to deliver, track and administer training

Curriculum, delivery infrastructure and program support

The Sun Academic Initiative program provides curriculum, delivery infrastructure, and program support of Sun technology to non-profit academic institutions world wide. The program includes:

- Free Web-based training on Java™ technology, Solaris™ OS system administration, Java Enterprise System infrastructure products and the complete StarOffice™ productivity suite.
- Online student self-registration is available to reduce complexity for the teacher and institution.
- Services to deliver more affordable instructor-led courses on Java technology, Solaris OS system administration, and the complete StarOffice productivity suite.
- No sign-up fee for academic institutions.
- No license fee for course material. Institutions can order course materials (instructor guides, student books, etc.) directly from Sun's fulfillment company.
- Very special certification exam fee offered directly by certification vendors to encourage students to take industry-recognized Sun professional certification exam.

Value to students and institutions

The Sun Academic Initiative provides benefits to student and institutions alike. The benefits to students include:

- Flexibility to study when and where it's convenient, at your own pace

- Ability to expand your knowledge base and gain competitive edge
- Access to obtain the skills you need to fast-track your career
- Preparation for industry-leading certifications and marketable job skills The benefits to institutions include:
- Easy to use, easy to access, free Web-based courses that are the perfect supplement to in-class instruction
- Ability to differentiate by offering cutting-edge technology training from the source
