

SunSM Multivendor Support for Fujitsu PRIMEPOWER Servers

When it comes to managing a multivendor environment, being in sync is a good thing.

Your IT environment holds the mission-critical information needed to run your business, and it wasn't created overnight. It's built of hardware and software from dozens of vendors, each with different support and maintenance requirements. Is there a way to get all of your service providers in sync so you can focus on your core business? Absolutely — SunSM Multivendor Support.

Highlights

- A flexible, consolidated plan for streamlined service and optimal support for all your Fujitsu PRIMEPOWER family of SPARC[®] Solaris[™] servers
- Convenience of a single point of accountability to reduce your management burden and free up your staff to concentrate on core business
- Seamless coverage of your Fujitsu products with single-sourced support to improve service levels and help resolve issues faster
- Direct access to around-the-clock assistance from experts you trust, when it matters, and with an SLA you define

Calm the chaos in your multivendor environment

Sun Multivendor Support is available for all Fujitsu PRIMEPOWER servers — and in combination with Sun's support of IBM, Hewlett-Packard, EMC, Dell, Brocade (including McData/CNT/InRange), and other platforms — offers true multivendor capabilities. You gain enhanced manageability and availability of Fujitsu PRIMEPOWER equipment through Service Level Agreements (SLAs) you define, providing quick problem resolution with direct access to help from experts. And with Sun as your single point of accountability, the management complexity you've been dealing with gets a whole lot simpler, giving valuable time back to your staff so they can focus on what's core to your business.

Comprehensive, integrated hardware and Solaris[™] OS coverage

With Sun, you will never have to worry if your coverage ends with hardware maintenance. You get access to the latest Solaris Operating System (OS) releases and patches along with accompanying documentation for both your Sun equipment, including your legacy Sun environment*, and Fujitsu PRIMEPOWER products as part of your coverage.

Match your support to your business

Sun's comprehensive support allows you to maintain choice and control by picking the level of support that's right for your business. Sun Multivendor Support provides four levels of service designed to match varying degrees of criticality. Key differences in levels of service are target response times for onsite problem diagnosis and incident management, and hours of coverage. You can be confident that whatever level of service you choose, Sun will provide responsive, consistent support from technicians with proven expertise and best practices.

Additional billable services from Sun not included in base agreement

- Installation, a one-time fee based on type of product
- Equipment upgrades, based on separate one-time charges per feature or model upgrade
- Reconfiguration changes, systems assurance planning, and reviews
- Equipment relocation, based on a fixed-price quotation or current time and materials rate
- Feature/function updates for software or microcode that introduce new features or functionality for Fujitsu PRIMEPOWER servers are not available from Sun but may be purchased separately from Fujitsu

What level of support is right for you?

Target onsite response time	Hours of coverage
2-hour response time**	24/7
4-hour response time**	24/7
Same-day response time**	8 a.m. to 5 p.m. M-F (excluding holidays)
Next-day response time**	8 a.m. to 5 p.m. M-F (excluding holidays)

* Ask your local Sun sales representative for details on our available support programs for every Solaris OS release.

** Within 50 kilometers of a Sun facility.

Onsite problem solving 24/7

Sun takes responsibility for complete problem resolution, regardless of the source of the problem. Initial resolution activities take place via toll-free access to one of our specially trained technical analysts for assistance with problem diagnosis or technical questions. If we can't resolve your problem remotely, we will send an expert to your premises within a two-hour* target response time.

*Response times based on your contracted level of support and 50-kilometer proximity to Sun service facility. Additional charges may apply for sites beyond this distance.

Manage more with less

Sun Multivendor Support can help you hold the line on expenses. A consolidated support contract saves you time and resources by freeing your staff to concentrate on core business issues and eliminates unpredictable vendor service costs. And, affordable service pricing helps you extend the life of your equipment so you can manage more with less.

Additional Sun Multivendor Support capabilities include:

Capability	How it works
Microcode support	Sun determines what microcode upgrade is needed and assists in applying the fixes. Most environments will not require microcode updates, and Fujitsu will supply upgrades that alleviate design errors (bug fixes) in Fujitsu PRIMEPOWER servers.
Technical support 24/7	Customers have 24/7 access to Sun's engineers residing within the Remote Resolution Center through a closed-loop, time-based escalation case tracking process.
Spare and logistics support	Replacement parts are provided and maintained at strategically located storehouses. Alliances with key parts providers allows for rapid response to equipment failures.
Concurrent maintenance	Maintenance tasks will be performed in a non-disruptive way during normal equipment operation whenever possible where the necessary technology exists in the equipment.

Comparison of Sun Multivendor Support versus Fujitsu:

Program features	Sun Multivendor Support	Fujitsu product maintenance services
Telephone support	X	X
