

Custom Testing and Certification United States

1. Scope

This service (“Service”) provides Customer with custom knowledge tests and /or custom certification tests, as mutually agreed upon by Customer and Sun. Tests consist of questions designed to measure knowledge of core tasks, jobs and roles in selected Customer departments and organizations. Tests will be developed from job analyses and/or role requirements provided by Customer to Sun. The only tasks and Deliverables Sun will undertake or deliver in providing this Service are those specifically set forth in this Service Listing.

2. Tasks and Deliverables

A. Custom Knowledge Tests

- **Define Project Scope.** Customer and Sun will mutually agreed upon the particular job or jobs for which knowledge tests will be developed and the number of custom knowledge tests and number of test questions to be developed.
- **Analyze and Validate Roles and Tasks.** Sun will work with Customer Subject Matter Experts (SMEs) to analyze role analysis data to ensure that custom knowledge tests are targeted to testing knowledge in the appropriate skills.
- **Create, Edit, and Review Test Questions.** Sun will work with SMEs to create the custom knowledge tests using questions pulled from Sun's test item pool or Sun will create new questions as mutually agreed. If Sun creates new questions, Sun will perform a technical review and Psychometric edit of such questions with SMEs to validate that the questions accurately measure job related knowledge.
- **Build, Deliver, and Score Tests.** Sun will build the tests and determine the passing score. Custom knowledge tests will be made available for access by Customer, via a web-based portal and will be proctored by Sun or the Customer as mutually agreed. Completed knowledge tests will be graded and the results will indicate scores by topic section in addition to an overall score.
