

Today, organizations need an effective way to provide their increasingly mobile workforce secure wireless access and management of their **Email & (PIM) Calendar, Contacts and Tasks**. As organizations source a solution, they are faced with a variety of challenges. One such challenge is selecting the appropriate wireless devices. Another is deciding on the appropriate wireless network(s) in order to provide the appropriate support for their entire organizational coverage requirements.

Most organizations are seeking a single solution that will offer them support for a variety of wireless devices. Providing a network independent solution will enable the organization a level of flexibility to change devices or networks as technology improves. Many organizations have expanded their requirements for wireless solutions to include both mobile wireless on voice and data networks as well as fixed wireless supporting all versions of 802.11x networks.

Notify Technology has designed the NotifyLink Enterprise Mobility Solution as a means to provide wireless access and management of **Email & PIM** information for any size organization. Notify's Enterprise solution will seamlessly integrate into an organization's existing network while offering the broadest possible wireless device support of any solution on the market today.

The NotifyLink Enterprise Mobility Solution interfaces with the Sun Communications Suite providing secure, real-time synchronized **Email & PIM** to and from a variety of wireless devices including Palm, BlackBerry, and Windows Mobile based handhelds. Users have the ability to compose, reply, forward, or delete their email while mobile.

### What Sets the NotifyLink Enterprise Mobility Solution Apart?

Unlike many other enterprise solutions, NotifyLink provides a single enterprise solution supporting virtually all Palm, Windows Mobile, and BlackBerry OS devices simultaneously over a variety of wireless networks: GSM/GPRS/EDGE, CDMA/1XRTT/EVDO, iDEN, and 802.11x.

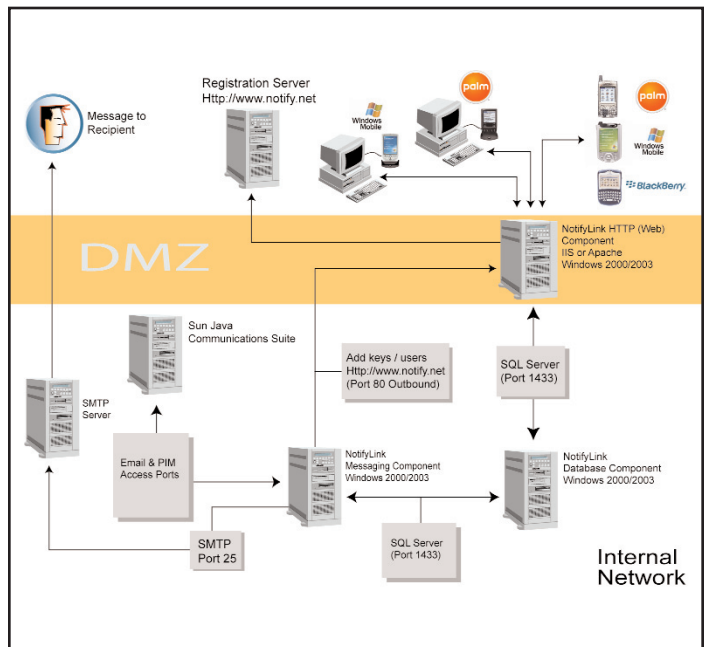

The NotifyLink Enterprise Mobility Solution provides Over-the-Air synchronization of **Email & PIM** thus freeing users from being required to cradle their wireless devices in order to maintain synchronization.

The NotifyLink Enterprise Mobility Solution provides "Schedule Push", "Direct Push" and "SMS Push" notification eliminating the need for users to initiate a data session in order to retrieve their personal data.

With NotifyLink, all **Email & PIM** information will be stored safely behind an organization's firewall while all delivery of information to and from the wireless devices is encrypted utilizing either the TDES or AES encryption algorithms.

NotifyLink provides maximum flexibility for the IT professional while minimizing complexity providing multiple internal user groups with a robust solution over multiple devices and or wireless networks.

### Supported Device Platforms

# NotifyLink Enterprise Mobility Solution for The Sun JCS

## Corporate User Benefits:

---

- Mobile Access & Management of Existing Email Accounts
- Support for Attachments on Palm, Windows Mobile and BlackBerry
- "PUSH" Notification of Email & (PIM)
- Mobile Synchronization of Email & (PIM)
- Does Not Require an "Always-On" Desktop Computer
- Platform Specific Device Client for Palm, Windows Mobile and BlackBerry devices
- Enable or Disable Email Synchronization from your Wireless Device
- Compose, Reply, Delete, & Forward from Wireless Device

## Customize Settings with the Web Client Interface:

---

- Define Message Notification Format
- Multilevel Filtering
- Track Mobile Activity
- Include or Exclude Email Response History

## IT Professional Benefits:

---

- Easy to Install & Configure
- Separate Web Based Administration for IT and End User
- All Data Stored Behind the Corporate Firewall
- End-to-End Encryption Supporting AES & Triple DES
- Enterprise Scalable System Architecture
- Simultaneous Support for Multiple Devices
- Supports a Variety of Wireless and Fixed Wireless (802.11x) Networks
- Configure, Add, Enable, Disable, Delete Users

## NotifyLink V4.0 for The Sun Java Communications Suite.

### Administration

---

- ▶ Simplified 1-Click Installation for single server deployments
- ▶ Improved Administration Interface
- ▶ Simplified Device Registration
- ▶ Device Management Interface

### Synchronization

---

- ▶ Folder Mirroring
- ▶ Automatic Synchronization of Contact Changes from Server
- ▶ Improved Email Synchronization of Deletes and Messages Marked as Read
- ▶ International Character Set Support via UTF-8 Encoding
- ▶ Global Contacts Remote Lookup

### Devices

---

- ▶ New NotifyLink V4.0 Client for BlackBerry
- ▶ New NotifyLink V4.0 Client for Windows Mobile
- ▶ New NotifyLink V4.0 Client for Palm Treo

## System Requirements:

---

The NotifyLink Enterprise Server requires three components - the SQL Database, Apache or IIS web server and the Sun Java Communications Suite to be installed. Requirements will vary depending on the component being installed. With NotifyLink's flexible architecture, these components may be installed to one server or may be distributed across multiple Servers. The components and their respective requirements are as follows:

- Microsoft Windows 2000 or 2003 Server
- Intel Pentium 4 processor or better
- 500MB RAM
- 250MB free hard drive space
- Microsoft SQL Server 7.0 or later (MSDE version of SQL may be used for smaller deployments)
- Microsoft Internet Explorer 4 or later
- APACHE HTTP Server version 1.3.x or 2.x or Micro-soft IIS 4 or later
- Port 80 inbound/outbound open.
- Requires the Sun Java Communications Suite "2005Q1" or "2005Q4" distribution.
- Email Port 143 / 993, PIM Port 3080 / 80
