»Synchronica SyncML Gateway

SYNCHRONIZE SUN JAVA ENTERPRISE SYSTEM OVER-THE-AIR WITH NOKIA, SONYERICSSON AND MOTOROLA PHONES

The Synchronica SyncML Gateway synchronizes Email, Calendar, Tasks and Contacts in your mobile phone over-the-air with Sun's Java Enterprise System (JES).

Synchronization is based on the open standard SyncML, supported in more than 150 SyncML phones from Nokia, SonyEricsson, Siemens, Motorola, PalmOne and others.

The Synchronica SyncML Gateway significantly improves the productivity of your mobile workforce. Users can synchronize their mobile phones over-the-air with Sun JES - wherever they are. Support for PDAs based on PalmOS and Microsoft PocketPC is available, too.

Absolutely no cables or software installation required for mobile phone synchronization. No need to reconfigure the firewall either—synchronization works over standard Internet connections. End-to-end security is guaranteed with strong encryption using SSL/HTTPS.

MORE THAN 150 SyncML PHONES AVAILABLE

SonyEricsson P910i

SonyEricsson T610

HP iPAQ hx4700

Nokia 7610

Nokia 9500
