30 May 2008

Sun Microsystems, Inc.
3215 NW 23rd Avenue
Camas, WA 98607

Attention: Jane Medefesser, Engineering Program Manager

Dear Ms. Medefesser,

This letter confirms that the Canadian Common Criteria Evaluation and Certification Scheme (CCS) has received the final evaluation report for Solaris 10 11/06 with Trusted Extensions (evaluation file number 383-4-57). The evaluation was performed by CGI Information Systems and Management Consultants, Inc. to an Evaluation Assurance Level of EAL 4+ (augmented by Flaw Remediation).

With the evaluation work now complete, the certification work has now begun. The CCS has provided ongoing technical oversight during the course of the evaluation and anticipates no obstacles in achieving final certification. A draft Common Criteria certificate is targeted for delivery within the next two weeks.

I wish to thank you for your continued interest in the Canadian Common Criteria Evaluation and Certification Scheme.

Sincerely,

Robert Harland
CCS Technical Manager
