

Enterprise Fabric Suite 2007 for SANbox® 9000

Simple, powerful and intuitive SAN
management software

QLogic® Enterprise Fabric Suite 2007 provides a powerful suite of fabric management tools for Fibre Channel switches and devices through easy to use interface.

Highlights

- QLogic's single pane of glass provides centralized management for your entire QLogic fabric
- Management of an unlimited number of switches and devices
- Seamless application for setup, configuration, zoning and advanced fabric management
- Manage stacks of SANbox switches as a single entity with Stack Management
- You decide which licensed ports are activated with mPort™ Technology
- Efficiently find the data you need with auto filtering

What is it?

Enterprise Fabric Suite 2007 is a fully integrated, seamless "suite" of fabric management tools for setup, configuration, zoning, fabric management, fabric monitoring, performance monitoring and configuring extended distance capability. Enterprise Fabric Suite 2007 can manage an unlimited number of switches and fabrics all from a single console.

Enterprise Fabric Suite 2007 is focused on the key areas of SAN management and provides these bundled with every SANbox 9000 ordered from Sun.

Performance Monitoring	Fabric Management	Installation
Distances	SANbox 9000 Management Software	Throughput
Fabric Monitoring	Security	Diagnostics

Enterprise Fabric Suite 2007	SAN Management Feature
QuickTools	Install and Configuration
Fabric Manager	Fabric Management
Extend Fabrics	Distance
Perf. Monitor	Performance Monitoring
Fabric Monitor	Fabric Monitoring
Adaptive 10 Gb Trunking	Throughput
Fabric Security Package	Security

And for those of you that prefer to use command line, the CLI is a comprehensive command line interface that provides simple, easy to find, easy to learn commands for all tasks that need to be performed in order to setup, configure and manage the SANbox portfolio of switches. Plus, integration with your favorite third-party applications is easy with the QLogic SANbox APIs, or the industry compliant SMI-s 1.1 agent.

How competitive solutions work

Enterprise Fabric Suite 2007 (EFS) provides an out-of-the-box experience that rivals the competition. Other vendors provide the equivalent of QuickTools with their FC Switch offerings and charge for all the add-on. Let's compare the QLogic SAN management software features that you get bundled, at no charge, to the others.
