

SUN STORAGE TEK™ 9900 SOFTWARE DYNAMIC PROVISIONING LIMITED TIME PROMOTION

*Get the first 10TBs free!**

Sun StorageTek™ 9900 Dynamic Provisioning software provides great value for managing your storage growth. With Dynamic Provisioning, you can:

- Improve storage utilization
- Simplify storage provisioning
- Add storage when needed, without disrupting applications
- Reduce power consumption and cooling costs

Also known as thin provisioning, Dynamic Provisioning allows open systems customers to overallocate storage, using less physical disk. You can plan ahead for storage growth, then add storage capacity as you need it. Because Dynamic Provisioning spreads workloads across a greater number of disks, you'll also see improvements in application performance.

If you're considering a StorageTek 9985V/9990V system, you'll want to take advantage of its thin provisioning features – and Sun wants to make that easy. For a limited time, Sun is pleased to offer StorageTek 9985V/9990V customers the first 10 TB of Dynamic Provisioning software free.*

For more information about the StorageTek 9985V/9990V and Dynamic Provisioning, and to learn how to take advantage of this special promotion, please contact your Sun sales representative for further information.
