

The Sun™ Compliance and Content Management Solution

Value Proposition

- Address regulatory compliance, corporate governance, and legal discovery/litigation support requirements
- Handles most types of data, files, and objects that must be retained, managed for an extended period of time, and purged based on corporate policy
- Reduce administrative tasks, server infrastructure, and storage costs
- Improve operational efficiencies while reducing risk with an end-to-end solution
- Create policy-based archiving in a heterogeneous environment
- Improve management with integrated search and supervision capabilities
- Enforce retention policies and provide on-demand access
- Provide continuous automated backup with fast and easy recovery
- Rapid retrieval of transparently migrated files
- Centralized and controlled administration

In today's ever-changing global environment, enterprises are looking to lower overall operational, administrative, and storage costs while meeting regulatory, corporate governance, or legal discovery/litigation support requirements. Designed with that in mind, the Sun™ Compliance and Content Management Solution provides an integrated solution to archive and manage most types of records—e-mail, instant messages, Enterprise Resource Planning (ERP) documents and data, electronic print records, office documents, plus other corporate records to address evolving global compliance and governance requirements or our customers.

Using Sun's unique architectural design with AXS-One's Compliance Platform™, this end-to-end solution helps organizations to build a scalable platform to address small (2,000 end users) to very large (greater than 100,000 end users) records retention and management requirements based on the organizations compliance strategy.

The easy-to-use, turnkey solution includes operational objectives such as creation of policy-based archiving, integrated search, integrated supervision, enforceable retention policies, on-demand access, continuous automated backup, fast and easy recovery, transparent file migration, rapid retrieval, and centralized administration.

Sun has partnered with AXS-One to deliver this best-in-class solution to help organizations create and derive meaningful value from the voluminous quantity of archived data. AXS-One's Compliance Platform, running on the robust Sun archiving platform, and central servers delivers an integrated solution for archival, legal discovery support, and records supervision, allowing organizations to address evolving regulatory and business compliance requirements according to the organizations policies. AXS-One has collaborated with Sun to test and optimize its' software for the Sun platform.

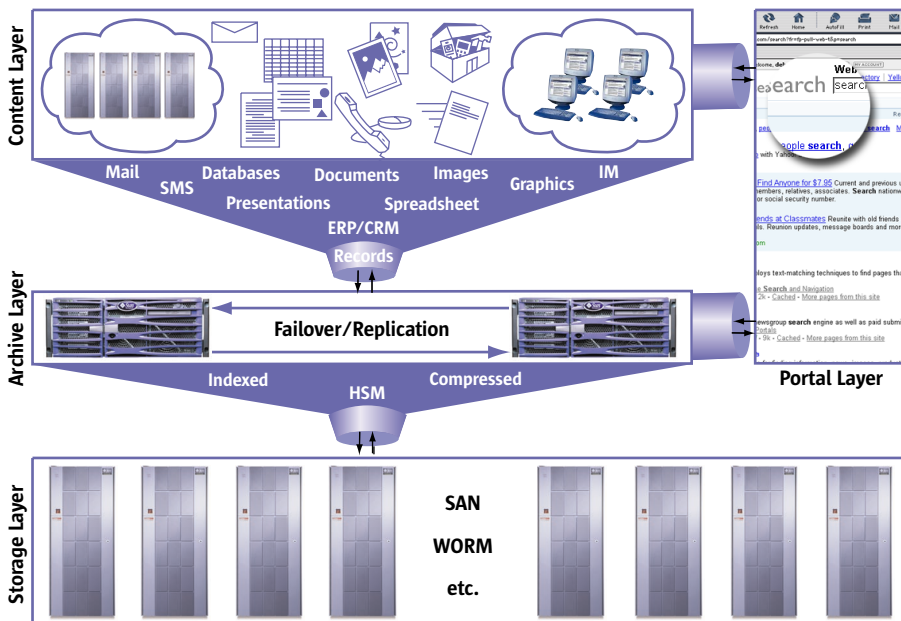

With AXS-One software, Sun can offer an integrated turnkey solution. The AXS-One software represents a more scalable, full-featured platform to address most record types. The combination of AXS-One software and Sun infrastructure provides an end-to-end solution for managing various different types of records within an organizations regulatory compliance program.

The Sun Compliance and Content Management Solution helps organizations trying to address evolving compliance mandates, including SEC 17a-4, NASD 3010, HIPAA, Sarbanes-Oxley, 21 CFR Part 11 and their equivalents around the world. It is designed to cost-effectively secure and manage corporate information according to a company's complex

business policies, while relieving the strain and bottlenecks on corporate mail servers and networks.

The Sun Compliance and Content Management Solution delivers powerful archival, retrieval, and discovery capabilities that improve operational efficiencies and reduces risk. It also reduces the inherent risks associated with retaining, managing, and expunging the significant volume and disparate types of documents and data generated by large organizations worldwide.

Many enterprises have already experienced significant improvements in productivity, network and e-mail server performance, as well as reductions in administrative tasks, server infrastructure, and storage costs by installing a single, extensible data repository that can address almost every class of data, file, and object that must be retained, managed for an extended period of time, and purged based on corporate policy. The solution is designed to help enterprise's to address regulatory compliance, business governance, and litigation support requirements our customers are facing while reducing the risk associated with retaining and managing exponentially growing volumes of corporate records.
