

Safari 10-Book Bookshelf eLibrary

WLIB-104-WVS

from Sun Services

eLibraries are collections of web courses grouped by technology that are available on a subscription basis at one low price per user. Each user is provided with unlimited access to all courses within a library for the subscription period.

The Safari Bookshelf Online eLibrary provides students with access to Sun's Web based, Safari Books during their subscription period. Safari Bookshelf is the premier electronic reference library for programmers and IT professionals. Unlike an online bookstore, Safari lets subscribers: Conduct searches across more than 1,500 electronic books simultaneously, read the books on your bookshelf from cover to cover, or, simply flip to the page you need.

Please note that this list is subject to change as new courses are created and existing courses are updated or retired. Periodically a course will be added that is an update to an existing course. If this occurs, the progress in old courses may end and students will be re-enrolled in the new course.

eLibrary licenses are available for 10 or more users. Pricing is determined by the eLibrary of interest and the total number of users.
