

Sun Java Desktop System™ eLibrary

WLIB-102

from Sun Services

eLibraries are collections of web courses grouped by technology that are available on a subscription basis at one low price per user. Each user is provided with unlimited access to all courses within a library for the subscription period.

The Java Desktop System™ eLibrary contains a series of courses listed below.

Please note that this list is subject to change as new courses are created and existing courses are updated or retired. Periodically a course will be added that is an update to an existing course. If this occurs, the progress in old courses may end and students will be re-enrolled in the new course.

eLibrary licenses are available for 10 or more users. Pricing is determined by the eLibrary of interest and the total number of users.
